CALL FOR APPLICATIONS FOR THE ADMISSION TO THE FIRST YEAR OF THE SINGLE-CYCLE MASTER'S DEGREE COURSE IN MEDICINE AND SURGERY (LM-41)
EU AND EQUIVALENT CANDIDATES
academic year 2026/2027

approved by Rector's Decree (D.R.) no. 127 of November 12, 2026

UniNeuromed guarantees equal opportunities between men and women for applications to this call: the use of the masculine gender to refer to individuals is solely due to text simplicity requirements.

Art. 1
Call for Applications and Available Places

For the 2026/2027 academic year, Neuromed Mediterranean University of Sciences and Technologies (hereinafter referred to as "UniNeuromed") hereby announces a public competition for admission to the first year of the Single-Cycle Master's Degree Programme in Medicine and Surgery (LM-41).

The number of places available is 157, reserved exclusively for applicants who are citizens of EU Member States and non-EU countries, exclusively resident in Italy, referred to in Article 39, paragraph 5, of Legislative Decree No. 286 of 1998.

The number of places available may be increased in the event of withdrawals or failure to complete enrolment procedures relating to the previous call for applications. The updated number of available places will be published on the University's website, on the page dedicated to Call for Applications.

Art. 2
Admission Requirements

Applicants eligible to apply for the admission competition governed by and set forth in this Call for Applications are citizens of EU Member States and non-EU countries residing in Italy, as referred to in Article 39, paragraph 5, of Legislative Decree No. 286 of 1998[1], as amended by Article 26 of Law No. 189 of 2002, who hold an upper secondary school diploma obtained in Italy following a course of study lasting at least four years, or a qualification already obtained abroad upon completion of at least 12 years of schooling, accompanied by a Declaration of Value issued by the Italian diplomatic mission abroad or a Statement of Comparability issued by the Italian ENIC-NARIC centre (CIMEA). Where the local education system provides for 11 or 10 years of schooling, the qualification shall be valid only if supplemented by one or two years of university studies and successful completion of all examinations required for the years attended.
Admission to the programme requires an adequate knowledge of the English language, corresponding to at least level B2 of the Common European Framework of Reference for Languages (CEFR).
The University shall verify compliance with the requirements set forth in this Article for the purposes of

Via dell'Elettronica, 1
86077 Pozzilli (IS) - Italy
tel. 0865 915256
segreteria@unineuromed.it
C.F. 90051570944
D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

admission, enrolment and attendance of the programme. Applicants who do not hold a suitable educational qualification in accordance with the applicable legislation shall forfeit their enrolment.

Art. 3

Terms and procedures for registration to the admission test

To participate in the selection process, it is necessary to:

1. Register for the admission test by 11:59 PM on December 13, 2026;
2. Pay the participation fee of € 150.00 by the same deadline

Candidates meeting the requirements specified in Art. 2 must submit their application exclusively online by connecting to the GOMP student portal available at the following link: https://unineuromedstudenti.gomp.it/

On the student portal, candidates must first register (by clicking the "REGISTER" button) and then, using the credentials (username and password) issued at the end of the registration process, complete the enrolment procedure for the call for applications by following the instructions provided in the "guide to submitting the application for admission" published on the website.

The online enrolment procedure for the admission test on the GOMP portal will be active from November 14, 2026, and will close at 11:59 PM on December 13, 2026.

Please note that during the registration phase on the GOMP student portal, new users are also required to accept the privacy policy. Candidates are responsible for the information they provide in every section of the application form. Once confirmed, the application for the selection process cannot be modified or integrated with additional documentation; therefore, candidates are advised to carefully check the uploaded documentation before submitting their application. The presence of false and/or incorrect information, or the omission of required information, will result in exclusion from the selection process or, in the event of passing the test, the cancellation from the ranking list of those admitted to the course. The participation fee for the admission test is non-refundable under any circumstances, even in the event of failure to participate in the test—regardless of the reason. Payment of the participation fee must be made at the time of application submission directly on the GOMP portal by accessing the section "Tasse e contributi > Pagamenti" (Tuition fees and contributions > Payments) via PagoPA. The application is considered complete only if it includes the payment of the fee, which must be made no later than the deadline indicated in this article. Applications received within the deadline but without the fee payment, or with a payment received after the deadline, will not be evaluated under any circumstances, and the candidate will therefore be excluded from the list of those admitted to the test.

The application is considered completed only if accompanied by the payment of the fee, to be made no later than the deadline indicated in this article. Applications received within the deadline but without the fee payment, or with the payment received after the deadline, will not be evaluated under any circumstances, and the candidate will therefore be excluded from the list of those admitted to the test.

Upon completion of the enrolment procedure, the system will issue a submission number (unique code) which candidates are required to keep, as it will be necessary to check their ranking upon publication of the admission test results (Art. 11 of the call for applications). Registration applications

received after the deadlines and/or incomplete and/or containing erroneous data will NOT be evaluated.

By submitting the registration application for the selection process, the candidate authorizes UniNeuromed to carry out verifications with the institutions and authorities that issued or validated the declared qualifications. Candidates are reminded that anyone making mendacious statements, forging documents, or making use of them is subject to the penalties, including criminal ones, provided for by current legislation (Art. 76 of Presidential Decree No. 445/2000). Requests for technical assistance or reports of technical problems encountered during the online registration procedure for the test must be sent exclusively via email to ufficioinformatico@unineuromed.it. Requests and reports will be answered only if received within the deadlines indicated in this article for completion of the procedure. Requests received after these deadlines or sent to different institutional addresses of the University will not be taken into consideration.

Art. 4

Candidates with Disabilities, Invalidity, and a Diagnosis of DSA (Specific Learning Disorders)

The admission exam is organised considering the specific needs of candidates with certified invalidity or disabilities pursuant to Article 16 of Law No. 104/1992, as well as candidates diagnosed with Specific Learning Disorders (SLD), pursuant to Law No. 170/2010.

Candidates with certified invalidity or disabilities pursuant to Law No. 104/1992, and candidates diagnosed with SLD who require specific assistive devices or compensatory measures to take the examination, as well as additional time, must explicitly request such accommodations in the relevant sections of the online application form before submitting it. They must also attach the relevant certification specifying the essential details concerning the requested accommodations, in order to enable the University to provide the necessary facilities and tools to ensure that candidates can take the examination under appropriate conditions. Candidates with Special Educational Needs (SEN) are excluded from this provision.

The University reserves the right to verify the documentation submitted by the candidate and undertakes to notify the candidate, in sufficient time before the examination, of the accommodations granted.

Candidates with certified invalidity or disabilities who submit, within the deadline specified in Article 3 above, certification issued by the competent local medical commission confirming the type of invalidity and/or the degree of disability recognised shall be entitled to additional time of up to 50% of the time allocated for the examination, as provided for in Article 5 below.

Should candidates with certified invalidity or disabilities require additional assistive devices, they must explicitly request them in the relevant section of the online application form.

Please note that, in any event:

- An enlarged format questionnaire shall be provided exclusively to candidates with visual impairments.
- The provision of a transcription assistant or reading tutor shall be assessed on the basis of the documentation submitted.

Via dell'Elettronica, 1
86077 Pozzilli (IS) - Italy
tel. 0865 915256
segreteria@unineuromed.it

D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

Candidates diagnosed with SLD who intend to request assistive devices and/or additional time must submit, within the deadline specified in Article 3 above, an SLD certification issued no more than three years prior to the publication date of this Call for Applications, or issued after the candidate has reached the age of 18. The certification must be issued by facilities belonging to the Italian National Health Service (SSN) or by entities and professionals accredited by the Regional Health Service. It must clearly state the diagnostic summary and the relevant diagnostic classification codes for the certified specific learning disorder.

Candidates diagnosed with SLD shall be granted additional time of up to 30% of the time allocated for the examination, as provided for in Article 5 below.

Should candidates diagnosed with SLD require additional assistive devices, they must explicitly request them in the relevant section of the online application form.

In any event, on the basis of the documentation submitted, the following compensatory tools may be authorised:

- Non-scientific calculator, exclusively for learning disorders affecting mathematical calculation skills or where specifically prescribed in the diagnostic report. In such cases, candidates may be authorised to use their own physical calculator or, alternatively, the calculator available on the examination platform.
- Reading tutor, appointed by the University or provided by the external service provider, exclusively in cases of particularly severe specific reading disorders.

Art. 5

Test Content and Evaluation Criteria

The selection test will be held in English and consists of a written multiple-choice test. The test comprises 60 questions (in English) with five response options, from which the candidate must identify only one, discarding any incorrect, arbitrary, or less probable conclusions.

Based on the syllabi indicated in Annex A, the questions are distributed as follows:

- 4 (four) questions on reading skills and general knowledge acquired during studies;
- 5 (five) questions on logical reasoning and problem-solving;
- 23 (twenty-three) questions on biology;
- 15 (fifteen) questions on chemistry;
- 13 (thirteen) questions on physics and mathematics.

The selection test will have a duration of 100 (hundred) minutes

For the evaluation of the test, a maximum score of 90 (ninety) points is awarded according to the following criteria:

• 1.5 points for each correct answer;
• Minus 0.25 for each incorrect answer
• 0 points for each omitted answer.

D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

Art. 6

Test Admission Procedures

The admission test will be held in a home-based digital mode from a workstation used by the candidate and through a remote surveillance platform on December 18, 2026. UniNeuromed reserves the right to schedule additional sessions, modify dates, times, delivery modes, and locations of the admission test, as well as the publication dates of the results, should it become necessary for organizational reasons and/or by ministerial decree, notifying all candidates through specific notices that will be adequately publicized on the University's website. In the event of a postponement of the test date, provided that such postponement is decided prior to the expiration of the test registration deadline indicated in the previous Art. 3, the University reserves the right to postpone the deadlines for submitting registration applications and, if deemed useful, to modify consequently the other dates provided for in this call. For the preparation of the admission test and for all operations related to the execution of the selection test, UniNeuromed utilizes an external company appointed on the basis of a specific mandate conferred by the University. The invigilators for this admission procedure will be selected from the company's staff and will handle, among other things, the identification operations of the competitors and surveillance during the administration of the test.

Art. 7

General Instructions for Test Participation

The test will be delivered via a platform that enables remote control, both live (in real-time through monitoring by proctors) and through test reviews (audio-video recording of all phases of the procedure). The room available to the candidate must be isolated, quiet, and equipped with a single access door that must remain closed for the entire duration of the procedure. The candidate's workstation must be clear of any objects. The candidate must connect their smartphone to a power outlet and position it sideways so that it is always able to effectively frame the workstation: in case of incorrect webcam placement, the candidate may face suspension of the test until the conditions necessary to guarantee the proctor's control over the correct execution of the exam are restored. If correct conditions are not restored, the test may be definitively interrupted and the candidate will be excluded from the competition.

To take the test, the candidate must have:

a) 1 PC (Windows 8 operating system or later, or LINUX) or MAC (MAC-OS 10.14 or later) equipped with a webcam and microphone, with the mandatory use of GOOGLE CHROME (min. version 81.0) as the browser;

b) Internet connectivity with a minimum upload and download speed of 1.5 Mbps;

1 smartphone or tablet (Android min. v.4.1 – iOS min. v.8) equipped with a camera, on which to download an APP. The tablet can only be used as a replacement for the smartphone, not for the PC (or MAC). The use of Wi-Fi is also recommended. Through a specific email, the candidate will be asked to download an APP onto their smartphone/tablet (34MB) from Google Play or the App Store (depending on whether an Android or iOS operating system is used). Candidates are required to verify the quality and continuity level of the reception signal coming from the workstation where they will take the test

Via dell'Elettronica, 1
86077 Pozzilli (IS) - Italy
tel. 0865 915256
segreteria@unineuromed.it
C.F. 90051570944
D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

and, in any case, from the environment in which the workstation is located. The Commission may order the exclusion of a candidate at any time if any malfunctions in the connection signal make it impossible to monitor the private environment where the test takes place. Any reception signal malfunction that occurs during the test and compromises its execution in whole or in part will be attributable solely and exclusively to the candidate. Therefore, the candidate is personally responsible for the quality and continuity of the inbound and outbound signal from their workstation and from the isolated room. In the days preceding the test and after the expiration of the test registration deadline indicated in the previous Art. 3, the candidate will receive the instructions to take the test from the address convocazioni@ilmiotest.it to the email address used during the registration of personal data, specifically containing instructions to follow for verifying the technical requirements. In the event that no message is received from the address convocazioni@ilmiotest.it , it is advisable to check that the message has not been archived in the junk mail folder (SPAM). If it is not present in junk mail either, it will be necessary to report this exclusively to the address convocazioni@ilmiotest.it and request a new email to be sent. The email sent from convocazioni@ilmiotest.it will contain the instructions to perform the "check requirements", i.e., the verification of technical requirements. Specifically, the candidate must:

• Install the Proctor Exam plugin for Google Chrome, which is necessary to ensure video surveillance during the test;
• Install the ProctorExam App on the smartphone (or tablet) that will be used during the test.

The candidate must follow the procedure to test the correct setup and operation of:

• Audio and microphone of the PC/Mac;
• webcam and microphone of the PC/Mac;
• Webcam of the smartphone/tablet;
• Internet network connection.

At the end of the "check requirements", the candidate will receive a second email from convocazioni@ilmiotest.it containing the link to access the test, along with the scheduled date and time. The indicated time must be strictly respected in order not to slow down the identification operations preceding the exam test. The candidate is required to carefully keep the data contained in this latest email, as it also provides the indications and credentials to view their own test, which will be made available after the publication of the admission test results on the institutional website of the University. Please note that should the candidate perform the checks with a workstation equipped with technical requirements lower than the minimum ones indicated in this call, passing this phase does not guarantee being able to take the competitive exam without the required equipment.

Art. 8

Admission test procedure

On the day of the exam, before the test begins, the procedure requires setting up and connecting the tools already verified during the "check requirements," followed by filming the workstation and the environment where the exam takes place. Subsequently, the candidate must connect their smartphone

Via dell'Elettronica, 1
86077 Pozzilli (IS) - Italy
tel. 0865 915256
segreteria@unineuromed.it
C.F. 90051570944
D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

to a power outlet and position it sideways so that it is always able to frame the workstation and the surrounding environment.
During the identification procedure, the candidate must:
1. Show a valid identification document via the PC webcam and take a photo of it;
2. Take a photo of their face inside an on-screen outline;
3. Submit both photos, which will be captured by the platform
After identification, and only if the checks are successful, the candidate will be able to access the link to connect to the exam and will have the necessary time to read the operating instructions. The candidate must then wait until the start of the test. The duration of this waiting time depends on the progress of the identification operations for all scheduled candidates. Candidates who, for any reason, connect after the identification phases have closed or who do not hold a valid identification document will not be admitted to the test. Candidates who are absent after the closure of the identification procedures will be considered to have tacitly withdrawn. As soon as the Exam Commission authorizes the start of the test, the "Start test" button will appear on the left side of the screen. Only at that moment, by clicking the specific button, will the candidate begin the test. At the end of the test, the candidate must click the "Close test" button and log out. Once back on the home page, the candidate must click the blue "Finish Exam" button at the top right. The use or consultation of other applications, browsers, or web pages is not permitted; therefore, all web pages and any open programs must be closed. Conversely, the platform pages must remain open at all times. In case of technical problems, the candidate can contact the live chat with the Proctor and technical support at any time. During the test, candidates may exclusively use their own PC/Mac without the aid of additional screens, keyboards, or mice. The use of two blank sheets of paper and a pen to perform calculations is permitted, subject to verification by the remote proctor during the identification phase.
The procedure provided for in this call will be held digitally and will be recorded by the platform:
upon completion of the test, the Commission will have access to the videos, including for disciplinary purposes in the event of a violation of the established rules.

Art. 9

Grounds for Disqualification from the Test

Under penalty of disqualification from the test, candidates are required to comply with the following provisions:
1. The room must be adequately lit;
2. The use of earphones, other technological tools such as smartphones, smartwatches, calculators, or glasses equipped with a video camera or photo camera is not permitted;
3. The use or consultation of other applications, browsers, or web pages is not permitted;
4. The use or consultation of books, notes, or lecture notes is not permitted;
5. The presence of any person other than the candidate in the room is not permitted;
6. Speaking or interacting with other people is not permitted;
7. Leaving the room for any reason, including physiological needs, is not permitted;
8. The use of earplugs is not permitted

Via dell'Elettronica, 1
86077 Pozzilli (IS) - Italy
tel. 0865 915256
segreteria@unineuromed.it
C.F. 90051570944
D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

Violation of the aforementioned provisions will result in the annulment of the test.

Art. 10

Commission for Ensuring the Regularity of Selection Procedures

A specific University decree will appoint a Commission tasked with ensuring the regular and correct execution of the selection procedures.

Art. 11

Admission Test Results Publication

The results of the admission test will be published on the University website by December 23, 2026. Candidates will be able to check their position using the submission number issued by the GOMP student portal at the time of enrolment for the test (Art. 3 of this call for applications). The merit ranking list, drawn up in compliance with the principles of impartiality, transparency, and equal treatment, is formulated based on the score achieved by the candidates in the admission test, according to the evaluation criteria and score assignment methods established in the previous Art. 5.

Only candidates who have achieved a minimum score of at least 10% of the maximum expected score (90) on the test are eligible for admission to the single-cycle Master's Degree Course in Medicine and Surgery; those who are ineligible will not be included in the ranking list.

Should a tie occur, the following criteria shall apply:

- Priority is given, in descending order, to the score obtained by the candidate in the resolution of questions relating to the subjects of biology, chemistry, physics and mathematics, logical reasoning and problem-solving, and reading skills and general knowledge acquired during studies, respectively;
- In the event of a further tie, the younger candidate by birth date shall prevail

Within the number of places available for enrolment, applicants who are suitably ranked in the aforementioned merit-based ranking list shall be admitted to the Single-Cycle Master's Degree Programme in Medicine and Surgery (LM-41).

Applicants ranked within the number of places available as specified in this Call for Applications shall be considered "admitted".

Applicants ranked below the last available position for admission shall be considered "eligible but not admitted". Such applicants may acquire the right to admission exclusively if the procedures for the subsequent advancement of the ranking list are activated, in accordance with Article 12 below. In such cases, their status shall be changed from "eligible" to "admitted".

The publication on the University's website, on the page dedicated to Calls for Applications, of the entrance examination results and all notices concerning the advancement of the ranking list shall constitute official notification to the applicants concerned.

Any individual notifications that may be sent to the email addresses provided by applicants during the examination registration process shall serve solely as a means of facilitating their monitoring of the admission procedure and shall in no way replace the notices published on the University's website, which constitutes the University's sole official communication channel.

Applicants are therefore responsible for checking their ranking status on the University's website and

Via dell'Elettronica, 1
86077 Pozzilli (IS) - Italy
tel. 0865 915256
segreteria@unineuromed.it
C.F. 90051570944
D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

for taking the necessary steps, within the prescribed deadlines and in accordance with the procedures set out in Article 12 of this Call for Applications, to complete their enrolment.

Art. 12

Enrolment and Ranking Shift Procedures

Starting from the publication of the ranking list and by 11:59 PM on January 7, 2027, candidates admitted to the Single-Cycle Master's Degree Course in Medicine and Surgery (LM-41) must complete their online enrolment by following the instructions that will be published on the University's website.
The enrolment procedure requires the submission to the University of the following documentation:
1. Enrolment application form;
2. Digital photograph;
3. Valid identity document and tax identification number (Italian Codice Fiscale) and, in the case of foreign nationals legally residing in Italy, a valid residence permit;
4. Self-certification, pursuant to Presidential Decree No. 445/2000, confirming possession of an upper secondary school diploma;
5. Payment of the first instalment, amounting to €5,000 (five thousand euros) for the 2026/2027 academic year;
6. Payment of the stamp duty (marca da bollo) amounting to €16.00 (sixteen euros);
7. Payment of the regional tax amounting to €140.00 (one hundred and forty euros).

The payments referred to in items 5, 6 and 7 must be made exclusively through the payment channels available on the GOMP Student Portal (PagoPA). No other payment methods are permitted.

The subsequent tuition instalments due for the 2026/2027 academic year must be paid by the following deadlines:
- Second instalment: €5,500 (five thousand five hundred euros), by 29 January 2027;
- Third instalment: €5,500 (five thousand five hundred euros), by 30 April 2027.

For information regarding the number and types of exemptions and financial benefits available, please refer to the Student Tuition and Fees Regulations for the relevant academic year, available on the University's website at the following address: www.unineuromed.it
Applicants who have been admitted but fail to complete their enrolment within the deadlines and in accordance with the procedures indicated above shall be deemed to have tacitly withdrawn.
Any places left vacant as a result of withdrawals or failure to complete enrolment shall be allocated through the following ranking list advancement procedure:

- Publication of a specific notice concerning the advancement of the ranking list on the University's website;
- Applicants admitted following the advancement of the ranking list must complete their enrolment and make the required payments in accordance with this Article by 1:00 p.m. on the third working day following publication of the relevant notice;

Via dell'Elettronica, 1
86077 Pozzilli (IS) - Italy
tel. 0865 915256
segreteria@unineuromed.it
C.F. 90051570944
D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

- The ranking list advancement procedure shall be repeated until all available places have been filled.

The University reserves the right to amend the enrolment procedures and deadlines where necessary for organisational and/or regulatory reasons, notifying all applicants in a timely manner through the publication of specific notices on the University's website.
Students holding educational qualifications obtained abroad must submit to the Student Administration Office documentation certifying the recognition of their qualifications in Italy. The following documents are accepted:

- Verification and/or Comparability Statements issued by CIMEA, accompanied by a legalised translation of the educational qualification into Italian or English;

or alternatively:

- A Declaration of Value issued by the Italian Embassy or the competent Italian Consulate General in the country where the qualification was obtained, accompanied by an official translation of the educational qualification into Italian or English.

Until the student submits the above-mentioned documentation to the Student Administration Office, admission to the degree programme shall remain conditional.
Students admitted on a conditional basis who fail to submit the required documentation by the beginning of the academic year may attend teaching activities but shall not be permitted to sit examinations.
The conditional status shall be lifted only upon receipt of the required documentation.
Should verification of the submitted documentation reveal that the minimum admission requirements established by the applicable legislation have not been met, the University shall proceed with the cancellation of the student's enrolment. Any tuition fees and university contributions already paid shall be retained and shall under no circumstances be refunded.
With regard to the possibility of simultaneous enrolment in multiple degree programmes, reference is made to the provisions of Law No. 33/2022 and the subsequent Ministerial Decrees No. 930 of 29 July 2022 and No. 933 of 2 August 2022, which shall apply in their entirety.
Applicants who fail to comply with the deadlines established in this Article shall be deemed to have withdrawn and shall forfeit their right to enrol. In such cases, any fees already paid shall under no circumstances be refunded by the University.
The University reserves the right to publish further calls for applications to fill any places that may remain vacant or unfilled following completion of the enrolment procedures and ranking list advancement procedures provided for in this Article, as well as following withdrawals from the degree programme, until all available places have been filled.

Art. 13

Additional Educational Obligations (OFA)

Students enrolled in the Single-Cycle Master's Degree Course in Medicine and Surgery who have not correctly answered at least 60% of the questions in biology, chemistry, physics, and mathematics on

the admission test may be assigned Additional Educational Obligations (Obblighi Formativi Aggiuntivi - OFA) restricted to the specific discipline in question. In this case, students are required to attend a specific training course aimed at fulfilling the OFA before taking the relevant exam required by the Study Plan, and in any case within the first year of the course of study.
The fulfilment of the OFA will be verified by the professors in charge of the courses.

Art. 14

Procedures for Withdrawal, Transfer, and Abandonment of Studies

Should enrolment be completed remotely or outside the University premises, and provided that the prerequisites established by current legislation on distance contracts are met, the student may exercise the right of withdrawal within 14 (fourteen) days from the conclusion of the contract. The intention to withdraw must be communicated to UniNeuromed via Certified Email (PEC) and, in cases provided for by current legislation for contracts concluded via online interfaces, through the specific online function made available by the University. In the event that this right of withdrawal ("ripensamento") is exercised, UniNeuromed will proceed to refund the student for the costs incurred for enrolment within the following 14 days, using the same means of payment used by the student for the initial payment, unless a different means of payment is expressly indicated. The refund does not apply to payments made for the revenue stamp and the regional tax. Amounts that are non-refundable by law or already transferred to third parties and non-recoverable by the University remain excluded from the refund. The exercise of the right of withdrawal is equivalent in its effects to the submission of a formal request for withdrawal from studies. Students who, after enrolment, wish to withdraw from their studies must submit a "formal request for withdrawal from studies" (istanza di rinuncia agli studi) using the online procedure on the GOMP student portal. By accessing the reserved area with their credentials, the student must go to the section "carriere > domande > domanda di rinuncia agli studi" (careers > applications > withdrawal from studies application). The mere cessation of lecture attendance or career actions does not equate to a withdrawal from studies and does not result in the closure of the university career. The student remains obligated to pay the tuition fees due for the academic year in which they are enrolled, in accordance with the provisions of these Regulations. For further details on this matter, please refer to the Student Fees Regulations for the academic year in question, available on the University website at the following link: www.unineuromed.it/

Art. 15

Mandatory Vaccinations

Students enrolling in the Single-Cycle Master's Degree Course in Medicine and Surgery (LM-41) are required to declare their commitment to undergo the following within 30 days of enrolment:

- The tuberculin skin test performed using the Mantoux technique, in accordance with the guidelines for the control of tuberculosis disease (provision of December 17, 1998, of the State Regions Conference) and Presidential Decree No. 465 of November 7, 2001, regulating antituberculosis vaccination, or via the QuantiFERON test;
- Vaccination against Hepatitis B, pursuant to Law No. 165 of May 27, 1991.

Via dell'Elettronica, 1
86077 Pozzilli (IS) - Italy
tel. 0865 915256
segreteria@unineuromed.it
C.F. 90051570944
D.M. n.140 del 28 gennaio 2026
Reg. C.d.C. il 2 febbraio 2026
PEC: unineuromed@legalmail.it

Students must also declare their commitment to undergo any other available vaccination that may be mandated from time to time by laws or regulations, or deemed appropriate by the University for the safety of the students themselves and of anyone they may come into contact with during their mandatory academic activities.
Students who fail to submit the aforementioned health documentation within the prescribed deadline will face a suspension of educational activities, without prejudice to the fulfilment of all other administrative obligations provided for by University Regulations. Should the required documentation not be received by the final deadline of February 28, 2027, the student's enrolment will be revoked (decaduto), and they will not be entitled to any refund of the fees paid.

Art. 16
Personal Data Treatment

In accordance with Articles 13 and 14 of EU Regulation 2016/679, candidates are informed that the processing of personal data provided for participation in the selection process is intended for score evaluation and management of the competition procedure, including any subsequent enrolment of the winners, as well as for statistical purposes related to university and scientific study and research. Data are processed by UniNeuromed, including through automated procedures. The provision of the requested data by candidates for the purpose of participating in the selection process is mandatory; failure to provide such data will result in exclusion from the procedure. The Data Controller is UniNeuromed – Neuromed Mediterranean University of Sciences and Technologies, with registered office at Via dell'Elettronica, 1 – 86077 Pozzilli (IS).In accordance with Article 37 of the GDPR, the University has designated a Data Protection Officer (RDP/DPO), who can be contacted directly for any matter concerning the processing of personal data and the exercise of one's rights at the following email address: dpo@unineuromed.it. The procedure described in Articles 6, 7, 8, and 9 of this call for applications will be held digitally and recorded by the platform: upon completion of the test, the Commission will have access to the videos, including for disciplinary purposes in the event of a violation of the established rules.

The complete Privacy Policy is available on the University's website at the following link: https://www.unineuromed.it/privacy-policy/

The Privacy Notice concerning the processing of personal data of applicants participating in the admission procedure governed by and set forth in this Call for Applications is available on the University's website, on the page dedicated to Calls for Applications, at the end of this Call for Applications.

Art. 17
Person in Charge of the Procedure and Publicity

The Person in Charge of the Procedure (Responsabile del procedimento) provided for in this call for applications is Massimo Pillarella, Eng. This call for applications is published on the University website at the address www.unineuromed.it/ : such publication constitutes official notification to the interested

parties for all legal purposes. All communications, notices, and information relating to this call and the selection procedure regulated herein are made public on the institutional website of UniNeuromed, which therefore constitutes the sole official communication tool for all interested parties. Candidates intending to participate in the selection process are responsible for constantly monitoring the website to review all updates that the University reserves the right to publish. The University declines any responsibility arising from the failure of candidates to read the published provisions or to fulfil their procedural obligations. All publications provided for in this call for applications constitute official notification to the interested parties for all legal purposes and consequences, and therefore exempt UniNeuromed from sending personal notifications and communications to candidates. All communications, notices, and information relating to this call will be made public on the institutional website, which constitutes the sole official communication tool for all interested parties. Therefore, candidates intending to participate in the selection process are responsible for constantly monitoring the website to review all updates that the University reserves the right to publish. The University declines any responsibility for the failure of candidates to read the published provisions or to fulfil their procedural obligations.

Art. 18

Final Provisions

Participation in the selection procedure provided for in this call for applications implies the full and unquestionable acceptance of the provisions contained here. For anything not covered in this call, reference is made to the relevant laws and regulations, as well as to the University Statute and Regulations available on the University's website. For any interaction regarding the university career, including administrative matters, from the age of majority onwards, the University will interact exclusively with the student. Therefore, communications of any nature and purpose from third parties, including parents, will not be taken into consideration and will not be answered in any way. The University reserves the right, at any stage, even after enrolment, to verify the truthfulness of the declarations made by the candidate, pursuant to current legislation on the matter. Candidates are therefore required to provide all the necessary elements to enable the appropriate verifications. In the event of untruthful statements, without prejudice to the penalties provided for by the criminal code and special laws on the matter, and the exposure of the declarant to actions for damages by interested parties, any enrolment will be cancelled, any benefits granted will be recovered, and the university tuition and fees paid will be retained and will not be refunded under any circumstances. The University reserves the right to modify, for organizational reasons and/or health safety requirements, the location of internships (both within and outside the region) and the delivery methods of the courses. The aforementioned modifications will be made known to the interested parties through the timely publication of notices on the University's website.
